MOURI TECH®

CAN YOUR UTILITY SCALE **AI BEYOND THE PILOT**—WITHOUT REPLACING WHAT ALREADY WORKS?

Connect what works.
Modernize what matters.
Build the foundation for AI at scale.

MOURI Tech is a trusted IT services provider helping global Energy & Utilities enterprises modernize operations, leverage AI and digital transformation and achieve sustainability goals in the energy, gas, water and waste management sectors. With expertise in engineering solutions, AI-driven insights and technology innovation, we empower businesses to thrive in a changing energy and utilities landscape.

OUR COMMITMENT TO THE ENERGY & UTILITIES INDUSTRY

Resilience & Efficiency

Modernizing infrastructure for reliable operations

Innovation & Automation

Leveraging AI and automation to streamline processes

Sustainability & ESG

Helping clients accelerate their net-zero journey

UtilityHub
AI FOR MODERN UTILITIES

UtilityHub is MOURI Tech's portfolio of purpose-built digital and AI platforms for Electric, Gas and Water Utilities.

Connect your systems. Build the foundation. Scale AI.

MOURI Tech supports utility modernization through systems integration, data and analytics, enterprise applications, cloud and cybersecurity. These capabilities help establish the connected technology foundations needed to apply AI to operational and business priorities.

1. **Connect operational and enterprise systems**
   OT/IT strategy and roadmaps, advanced distribution management systems and smart metering implementation.
2. **Improve visibility into asset condition**
   Asset tracking, predictive maintenance, and imagery processing using aerial, drone and satellite imagery.
3. **Strengthen grid planning and distribution decisions**
   Load forecasting, grid-planning analytics, and energy-loss and theft analytics.
4. **Support emerging energy initiatives**
   Blockchain for energy transactions and sustainability metrics.
5. **Strengthen customer engagement**
   Omnichannel customer engagement strategy, AI-powered chatbots and virtual assistants for IVR and customer-experience insights.

The enterprise foundations behind utility modernization

Enterprise Digital Transformation

Process optimization, data and analytics modernization, digital experiences and automation.

Intelligent ERP

ERP implementation and support across finance, workforce, assets, supply chain and procurement.

Cloud & Infrastructure

Cloud migration, infrastructure modernization, systems integration, connected-device enablement and business continuity.

Cybersecurity & Resilience

Enterprise security, identity and threat management, OT protection and risk and compliance frameworks.

MOURI Tech builds the connected foundation your utility can depend on.

AI-Enabled Solutions for Modern Utilities.

Governed AI. Sovereign control.
Your LLM. Your cloud.

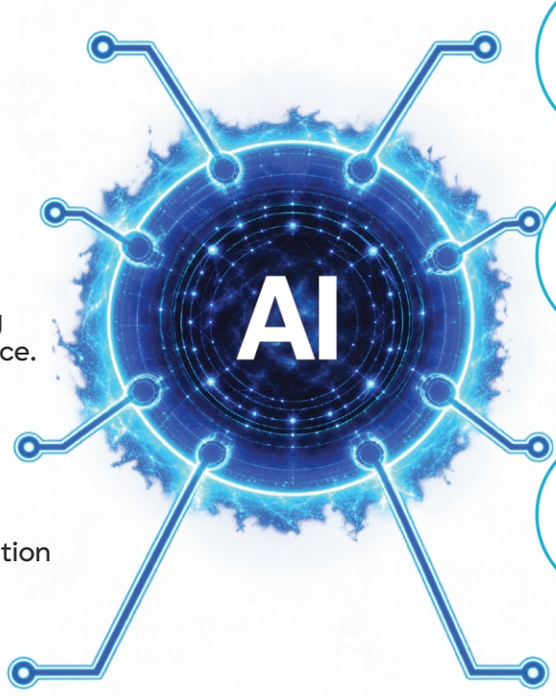

MOURI Tech brings together AI implementations, enterprise platforms, integration and digital assurance to support modernization and practical AI adobption.

Grid Planner
Intelligent expansion, load balancing.

Renewable Energy Optimization
Real-time monitoring predictive maintenance.

Field Inspection
Drone-based automation compliance tracking.

Asset Health Agent
Intelligent expansion, load balancing.

Demand Response
Dynamic load shifting and real-time grid balancing based on usage patterns.

Water & Gas Pipeline Monitoring
AI-powered leak detection, anomaly tracking

Vegetation Management
Predictive trimming, wildlife prevention.

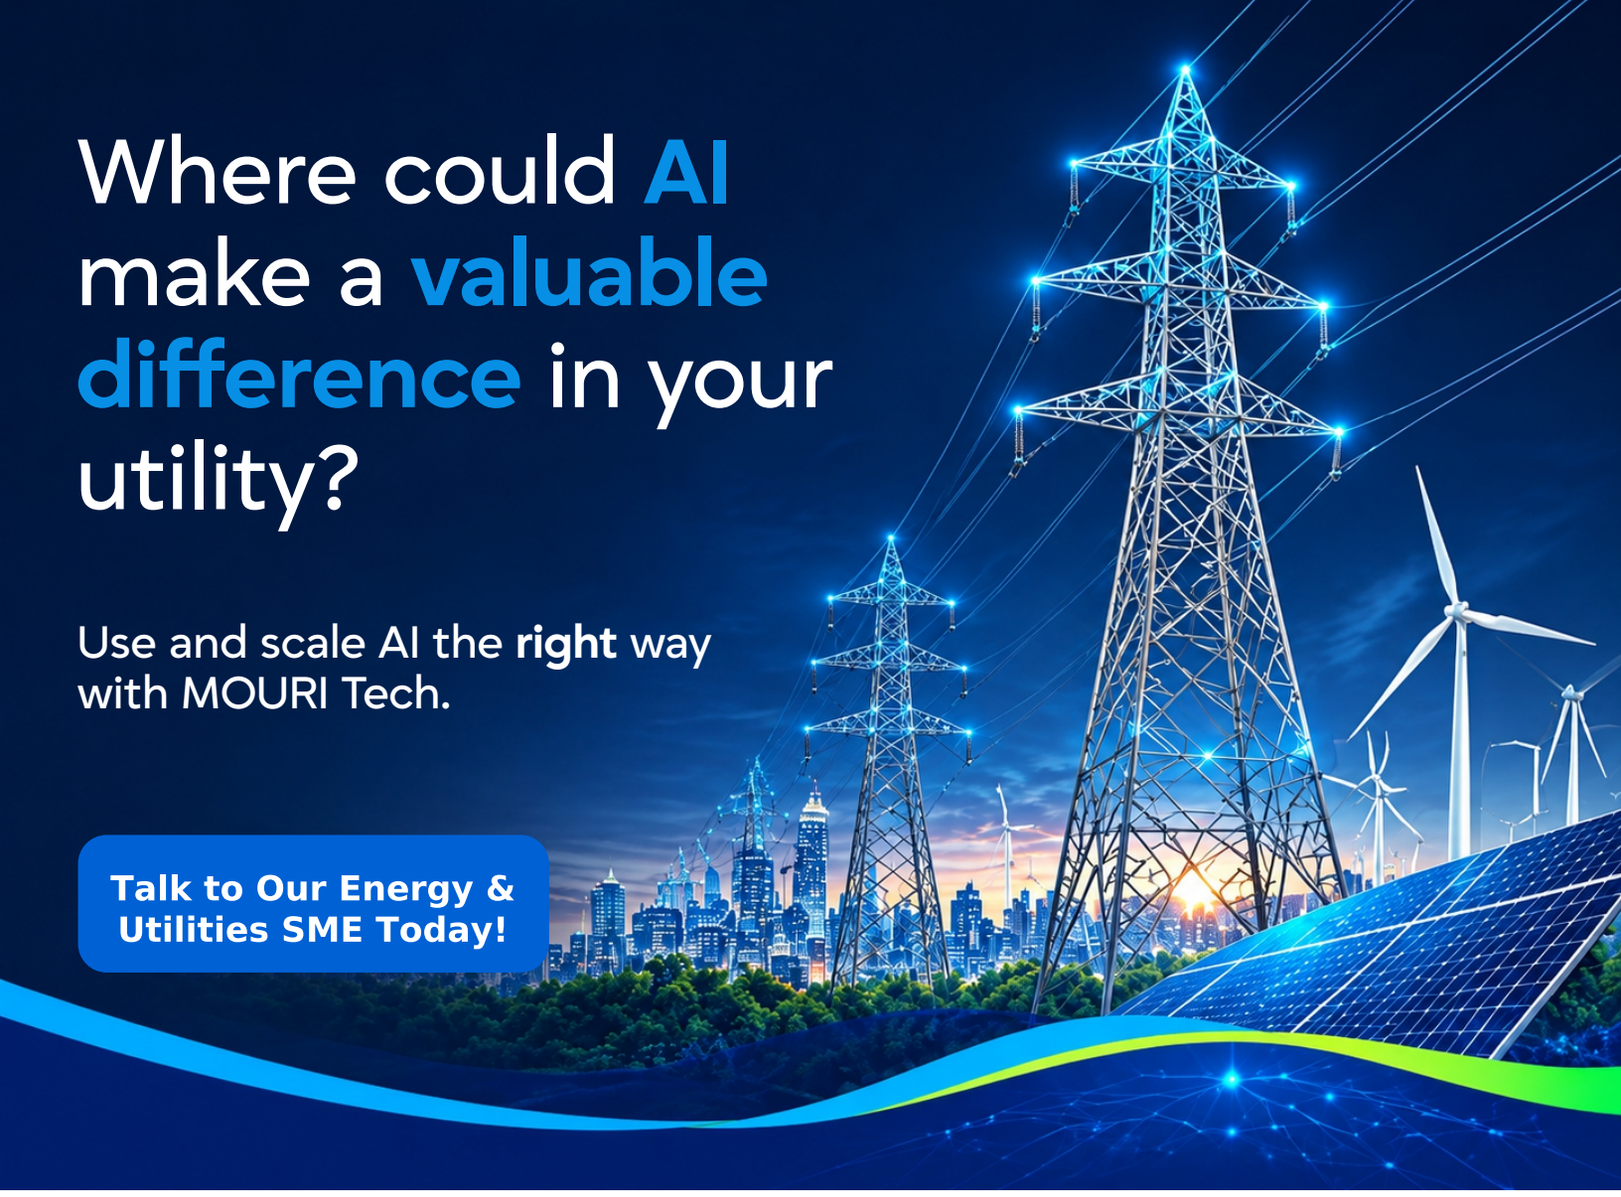

Construction Management
Field-to-finish Capital Project Delivery.

Your Path to Agentic AI

- Data Foundation & Integration
- Digital-first Contract Centers
- Advanced Analytics
- Agentic AI
- Business Intelligence & Reporting
- AI & Machine Learning Implementation
- Generative AI
- Artificial General Intelligence - Future Vision
